2	Medical-Surgical Nursing I 10.5 credit hours/ 1st semester	1610-311	Theory, Clinical Instructor, supervision, and assessment of student presentations at afternoon tutorial
3	Fundamentals of Nursing II 6 credit hours / 2 nd semester	1610-252	Clinical Instructor
4	Medical-Surgical Nursing II 10.5 credit hours/ 2 nd semester	1610-312	Course Co-coordinator, Theory, Clinical Instructor, supervision, and assessment of student presentations at afternoon tutorial
5	Health Assessment	NURS-202	Course Co-coordinator, Clinical Instructor

Brief Description of Undergraduate Courses Taught: (Course Title – Code: Description)

1	<p>Fundamentals of Nursing I This course is designed to provide the student with the knowledge, skills and attitude that help to build a solid foundation for professional nursing practice. It also introduces the student to the knowledge and clinical skills necessary for the care of the client in</p>
---	---

	times of illness and wellness. The practical component is structured to assist students to develop competency in basic nursing skills and procedures.
3	Fundamentals of Nursing II This course includes two componen the theoretical and practical. theoretical components of this course are designed to provide students with the opportunity to demonstrate competency in performing basic nursing skills for individuals with common health alterations . The clinical laboratory will include simulations and interactions with patients in hospital. The nursing process will serve as the frame for this foundation course.
2, 4	Medical - Surgical Nursing I and II The course provides the student with the necessary knowledge, skills and attitude that would enable them to provide high quality nursing management for Medical-Surgical patients in both general medical and surgical wards. This is in addition to the different therapeutic modalities used for both medical and surgical patients. The course also focuses on the application of nursing process and utilization of the concept of self-care in providing comprehensive nursing management for medical and surgical patients with special consideration to the maintenance of patients' safety throughout care and promotion of home and community-based care.
5	Health Assessment Skills The course provides the student with the necessary knowledge, skills and attitude that would enable them to do health/physical assessment skills. The students will develop competence in identifying, describing, and recording normal findings.

Student Academic Supervision and Mentoring
