

## Google Scholar

1. First, sign in to your Google account, or create one if you don't yet have one. We recommend that you use a personal account, not an account at your institution, so that you can keep your profile for as long as you wish.
2. Once you've signed in to your Google account, open the [Scholar profile sign up form](#), confirm the spelling of your name, enter your affiliation, interests, etc. We recommend that you also enter your university email address; this would make your profile eligible for inclusion in Google Scholar search results.

### Google Scholar Profiles

Google Scholar Profiles provide a simple way for authors to showcase their academic publications. You can check who is citing your articles, graph citations over time, and compute several citation metrics. You can also make your profile public, so that it may appear in Google Scholar results when people search for your name, e.g., [richard feynman](#).

Best of all, it's quick to set up and simple to maintain - even if you have written hundreds of articles, and even if your name is shared by several different scholars. You can add groups of related articles, not just one article at a time; and your citation metrics are computed and updated automatically as Google Scholar finds new citations to your work on the web. You can choose to have your list of articles updated automatically or review the updates yourself, or to manually update your articles at any time.

[Set up your Google Scholar Profile](#)

3. On the next page, you'll see groups of articles written by people with names similar to yours. Add all articles that you have written; keep in mind your articles may be in several different groups, and some groups may occasionally include articles by several different authors. If you publish under several different names, you may need to do several searches to add all your articles.

- Once you're done with adding articles, it will ask you what to do when the article data changes in Google Scholar. You can either have the updates applied to your profile automatically, or you can choose to review them beforehand. In either case, you can always go to your profile and make changes by hand.

- Finally, you will see your profile. This is a good time to add a few finishing touches - upload your professional looking photo, visit your university email inbox and click on the verification link, double check the list of articles, and, once you're completely satisfied, make your profile public. Voila - it's now eligible to appear in Google Scholar when someone searches for your name!
