

Storing Medications at Home Appropriately

How to store drugs in the appropriate way?

- Don't leave the medication in the car.
- Keep it out of reach for kids.
- Make sure the medicine packaging is tightly closed.
- Do not leave medication in bedrooms, especially children's rooms.
- Keep them in their original container and do not transfer them to other containers.
- Keep them in a safe place, isolated from heat and direct sunlight.
- Keep it in a dry place away from the kitchen and wet places in the house such as bathrooms.
- Follow the instructions of the leaflet attached to the drug or consult the pharmacist about the proper storage of the the medication.

What are the appropriate temperatures for storing medications?

- **Room Temperature:**

15 - 25 ° C (in some drugs may be allowed to reach 30 ° C)

- **Refrigerator Temperature:**

2 - 8 ° C.
